Management's Discussion & Analysis of Results of Operations and Financial Condition

Second Quarter Ended June 30, 2011

(Dollars in thousands, except as noted)

(Unaudited)

Results of Operations: Second Quarter

Net income for the second quarter of 2011 was \$1.835 million, up \$84 thousand (5%) from net income of \$1.751 million in the second quarter of 2010.

There was no provision for loan losses in the second quarter of 2011, as compared to a provision for loan losses of \$58 thousand in the second quarter of 2010.

Net interest income before the provision for loan losses was up \$86 thousand (3%) in 2011 as compared to 2010. The following table shows the components of this increase:

<u>Changes in net interest income due to:</u>	
Changes in volumes of accrual loans & debt	\$ (159)
Changes in interest rates on accrual loans & debt	340
Changes in interest income on nonaccrual loans	(1)
Changes in interest rate swap income	(96)
Other adjustments	<u>2</u>
Total change in net interest income	<u>\$ 86</u>

Changes in accrual volumes and rates are shown in the following table:

	Three Months Ended June 30,	
	2011	2010
Average accrual loan volume	\$ 323,031	\$ 343,639
Average interest rate on loans	4.33%	4.08%
Average interest rate spread	3.39%	2.95%

Average loan volume was lower in 2011, and this contributed a decrease of \$159 thousand to the total change in net interest income, as shown in the first table above. The average interest rate spread was higher in 2011 which contributed to an increase of \$340 thousand in net interest income, as shown in the first table above.

Other expense increased by \$109 thousand (6%) in 2011 as compared to 2010. Salaries and employee benefits increased by \$65 thousand (7%). The Farm Credit Insurance premium increased by \$46 thousand. The negative premium in 2010 was due to a reduction in the premium rate which was retroactively effective January 1, 2010.

Results of Operations: Year-to-Date

Net income through the second quarter of 2011 was \$3.832 million, down \$0.3 million (8%) from net income of \$4.135 million through the second quarter of 2010.

There was no provision for loan losses through the second quarter of 2011, as compared to a provision for loan losses of \$89 thousand for the same period in 2010.

Management's Discussion & Analysis (cont.)

Net interest income before the provision for loan losses was up \$153 thousand (3%) in 2011 as compared to 2010. The following table shows the components of this increase:

<u>Changes in net interest income due to:</u>	
Changes in volumes of accrual loans & debt	\$ (321)
Changes in interest rates on accrual loans & debt	593
Changes in interest income on nonaccrual loans	38
Changes in interest rate swap income	(164)
Other adjustments	7
Total change in net interest income	<u>\$ 153</u>

Changes in accrual volumes and rates are shown in the following table:

	Six Months Ended June 30,	
	2011	2010
Average accrual loan volume	\$ 324,656	\$ 345,670
Average interest rate on loans	4.33%	4.10%
Average interest rate spread	3.36%	2.97%

Average loan volume was lower in 2011, contributing a decrease of \$321 thousand to the total change in net interest income, as shown in the first table above. The average interest rate spread was higher in 2011 which contributed to an increase of \$593 thousand in net interest income, as shown in the first table above.

Other income decreased by \$378 thousand (22%) in 2011 as compared to 2010. This decrease resulted primarily from \$390 thousand in refunds received in 2010 from the Farm Credit System Insurance Corporation related to the Farm Credit Insurance Fund.

Other expense increased by \$167 thousand (5%) in 2011 as compared to 2010. Salaries and employee benefits expense increased by \$124 thousand (7%).

Loan Portfolio and Financial Condition

Loans originated by the Association decreased by \$3.5 million (1%) from year-end. Loans purchased decreased by \$0.9 million (9%) from year-end, and participations sold increased by \$2.8 million (7%). Loans held by the Association decreased by \$7.2 million (2%) from year-end.

The loan portfolio continues to be concentrated in the dairy industry. Farm prices for dairy products increased in the second quarter of 2011. Federal Order 1 prices for the second quarter of 2011 averaged \$20.48/cwt, up \$2.92/cwt (17%) from the first quarter of 2011, and up \$4.96/cwt (32%) from the second quarter of 2010. (Prices quoted do not include the effect of the Milk Income Loss Contract.) The change in prices received for dairy products has been accompanied by an increase in the cost of farm inputs, particularly purchased feed. The composite Feed Index published by the USDA was 227 for the second quarter of 2011, up 9% from the first quarter of 2011, and up 7% from the second quarter of 2010. (Feed Index = 100 for 1990-1992)

Loan quality improved slightly and remained strong through the second quarter of 2011. Loans graded Substandard or lower were 7.2% of total loans at June 30, 2011, 0.1% adverse to year-end. High risk assets comprised 1.6% of loans and related assets at June 30, 2011, 0.5% improved from at year-end. (High risk assets include nonaccrual loans, accrual restructured loans, loans delinquent 90 days or more but not yet classified as nonaccrual, and other property owned.) Repayment performance worsened slightly in the second quarter of 2011. Accrual loans delinquent 30 days or more were 0.5% at June 30, 2011, up 0.2% from year-end. The 12-month rolling average for this statistic was 0.5% at June 30, 2011, down 0.3% from year-end. There were no charge-offs, but recoveries of \$4 thousand in the first two quarters of 2011. There were no charge-offs or recoveries in the first two quarters of 2010.

As discussed in the 2010 Annual Report to Shareholders, the Association declared a patronage distribution of \$3.659 million based on 2010 earnings, 100% in cash. This was paid on March 25, 2011.

Management's Discussion & Analysis (cont.)

Members' equity as a percentage of assets was 21.8% at June 30, 2011 as compared to 20.7% at year-end. The Association's permanent capital ratio was 20.4% at June 30, 2011, up 1.1% from year-end.

These financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

YANKEE FARM CREDIT, ACA

Notes To Consolidated Financial Statements

Second Quarter Ended June 30, 2011

(Dollars in thousands, except as noted)

(Unaudited)

NOTE 1 - ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Yankee Farm Credit, ACA (the Association) is a member-owned cooperative within the Farm Credit System. A description of the organization and operations of the Association, the significant accounting policies followed, and the financial condition and results of operations as of and for the year ended December 31, 2010 are contained in the 2010 Annual Report to Shareholders. These unaudited second quarter 2011 financial statements should be read in conjunction with the 2010 Annual Report to Shareholders.

In June 2011, the Financial Accounting Standards Board (FASB) issued guidance entitled, "Comprehensive Income – Presentation of Comprehensive Income." This guidance is intended to increase the prominence of other comprehensive income in financial statements. The current option that permits the presentation of other comprehensive income in the statement of changes in equity has been eliminated. The main provisions of the guidance provides that an entity that reports items of other comprehensive income has the option to present comprehensive income in either one or two consecutive financial statements:

- A single statement must present the components of net income and total net income, the components of other comprehensive income and total other comprehensive income, and a total for comprehensive income.
- In a two-statement approach, an entity must present the components of net income and total net income in the first statement. That statement must be immediately followed by a financial statement that presents the components of other comprehensive income, a total for other comprehensive income, and a total for comprehensive income.

This guidance is to be applied retrospectively. For public entities, it is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The adoption of this guidance will not impact financial condition or results of operations, but will result in changes to the presentation of comprehensive income.

In May 2011, the FASB issued guidance entitled, "Fair Value Measurement – Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRS." The amendments change the wording used to describe the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. The amendments include the following:

1. Application of the highest and best use and valuation premise is only relevant when measuring the fair value of nonfinancial assets (does not apply to financial assets and liabilities.)
2. Aligning the fair value measurement of instruments classified within an entity's shareholders' equity with the guidance for liabilities. As a result, an entity should measure the fair value of its own equity instruments from the perspective of a market participant that holds the instruments as assets.
3. Clarifying that a reporting entity should disclose quantitative information about the unobservable inputs used in a fair value measurement that is categorized within Level 3 of the fair value hierarchy.
4. An exception to the requirement for measuring fair value when a reporting entity manages its financial instruments on the basis of its net exposure, rather than its gross exposure, to those risks.
5. Clarifying that the application of premiums and discounts in a fair value measurement is related to the unit of account for the asset or liability being measured at fair value. Premiums or discounts related to size as a characteristic of the entity's holding (that is, a blockage factor) instead of as a characteristic of the asset or liability (for example, a control premium), are not permitted. A fair value measurement that is not a Level 1 measurement may include premiums or discounts other than blockage factors when market participants would incorporate the premium or discount into the measurement at the level of the unit of account specified in other guidance.
6. Expansion of the disclosures about fair value measurements. The most significant change will require entities, for their recurring Level 3 fair value measurements, to disclose quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements. New disclosures are required about the use of a nonfinancial asset measured or disclosed at fair value if its use differs from its highest and best use. In addition, entities must report the level in the fair value hierarchy of assets and liabilities not recorded at fair value but where fair value is disclosed.

The amendments are to be applied prospectively. The amendments are effective during interim and annual periods beginning after December 15, 2011. Early application is not permitted.

In January 2011, the FASB issued guidance entitled, "Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings." This guidance temporarily delayed the effective date of the disclosures about troubled debt restructurings required by the guidance previously issued on "Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses." The effective date of the new disclosures about troubled debt restructurings (TDR) coincides with the guidance for determining what constitutes a TDR as described below.

In April 2011, the FASB issued its guidance entitled, "A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring," which provides for clarification on whether a restructuring constitutes a TDR. In evaluating whether a restructuring is a TDR, a creditor must separately conclude that both of the following exists: (1) the restructuring constitutes a concession, and (2) the debtor is experiencing financial difficulties. For nonpublic entities, the guidance is effective for annual periods ending on or after December 15, 2012, including interim periods within those annual periods. The Association is currently evaluating the impact of adoption of this Standard on the financial condition or results of operations. The adoption will result in additional disclosures.

In July 2010, the FASB issued guidance on "Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses." This guidance is intended to provide additional information to assist financial statement users in assessing an entity's credit risk exposures and evaluating the adequacy of its allowance for credit losses. Existing disclosures are amended to include additional disclosures of financing receivables on a disaggregated basis (by portfolio segment and class of financing receivable) including among others, a rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the method of impairment (individually or collectively evaluated). The guidance also calls for new disclosures including but not limited to credit quality indicators at the end of the reporting period by class of financing receivables, the aging of past due financing receivables, nature and extent of financing receivables modified as troubled debt restructurings by class and the effect on the allowance for credit losses. For public entities, the disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. The adoption of this Standard did not impact the Association's financial condition or results of operations, but did result in significant additional disclosures.

In January 2010, the FASB issued guidance on "Fair Value Measurements and Disclosures," which is to improve disclosures about fair value measurement by increasing transparency in financial reporting. The changes will provide a greater level of disaggregated information and more robust disclosures of valuation techniques and inputs to fair value measurement. The new disclosures and clarification of existing disclosures were effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the rollforward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption of this Standard did not impact the Association's financial condition or results of operations but did result in additional disclosures.

The accompanying financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform to generally accepted accounting principles and prevailing practices within the banking industry. The results of operations for the six month period ended June 30, 2011 are not necessarily indicative of the results to be expected for the full year.

NOTE 2 –LOANS AND ALLOWANCE FOR LOAN LOSSES

A summary of loans follows:

	Value at	
	June 30, 2011	December 31, 2010
Real Estate Mortgage	\$ 125,259	\$ 127,250

Rural Residential Real Estate	1,690	1,751
Total loans	<u>\$ 329,189</u>	<u>\$ 336,406</u>

The Association purchases and sells participations interest with other parties in order to diversify risk, manage loan volume and comply with FCA regulations. All of the Association's loan purchases and sales are with other Farm Credit institutions. The following table presents information regarding the balances of participations purchased and sold at June 30, 2011:

	Participations Purchased	Participations Sold
Real Estate Mortgage	\$ 1,080	\$ 5,360
Production and Intermediate Term	385	20,696

Farm Related Business	-	630	630
Rural Residential Real Estate	-	-	-
Total impaired loans	<u>\$ 1,749</u>	<u>\$ 2,636</u>	<u>\$ 4,385</u>

There were no loans 90 days or more past due but still classified as accrual at June 30, 2011 or December 31, 2010.

One credit quality indicator utilized by the Association is the Farm Credit Administration Uniform Loan Classification System that categorizes loans into five categories. The categories are defined as follows:

- Acceptable – assets are expected to be fully collectible and represent the highest quality,
- Other assets especially mentioned (OAEM) – assets are currently collectible but exhibit some potential weakness,
- Substandard – assets exhibit some serious weakness in repayment capacity, equity, and/or collateral pledged on the loan,
- Doubtful – assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable, and
- Loss – assets are considered uncollectible.

The following table shows loans and related accrued interest as a percentage of total loans and related accrued interest receivable by loan type as of:

NOTE 3 - CAPITAL

Please see the 2010 Annual Report to Shareholders, particularly Note 7 to the Financial Statements, for a description of the Association's capitalization policies. The Association's requirement for purchased equities (stock and participation certificates) is presently the legal minimum of 2.0% of the loan with a cap of \$1 thousand.

The patronage distribution for 2010 was \$3.659 million and was distributed 100% in cash on March 25, 2011. A patronage distribution program is also in effect for 2011. The amount of the patronage distribution for 2011 will depend on financial results for the year as a whole and is therefore not known with certainty at this time. However, management estimates that the patronage distribution attributable to the first two quarters of 2011 is approximately \$1.638 million. Management believes it is probable that the 2011 patronage distribution will be paid 100% in cash. Therefore, the accompanying financial statements show an interim accrual at the end of the second quarter of 2011 for patronage distribution payable of \$1.638 million. The corresponding interim accrual at the end of the second quarter of 2010 for patronage distribution payable was \$1.519 million (also 100% cash).

The Association's regulatory capital ratios were:

	Value At		Regulatory Minimum
	June 30, 2011	December 31, 2010	
Core surplus ratio	20.0%	19.0%	3.5%
Total surplus ratio	20.0%	19.0%	7.0%
Permanent capital ratio	20.4%	19.3%	7.0%

Additionally, for 2011, the Association has established an internal minimum of 15.0% for the permanent capital ratio and a goal of 20.0%. The ratio at June 30, 2011, as indicated above, is not indicative of the full year.

NOTE 4 - INCOME TAXES

Please see the 2010 Annual Report to Shareholders, particularly Note 8 to the Financial Statements, for a description of the Association's deferred tax assets and liabilities and the corresponding valuation allowance. There were no significant changes in the composition or valuation of tax assets/liabilities during the first two quarters of 2011.

NOTE 5 - FAIR VALUE MEASUREMENTS

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability. Please see the 2010 Annual Report to Shareholders, particularly Note 2L and Note 11 to the Financial Statements, for a more complete description.

Assets measured at a fair value on a recurring basis at June 30, 2011 are summarized below:

	Fair Value Measurement Using		
	Level 1	Level 2	Level 3
<u>Assets:</u>			
Interest Rate Swaps	\$ -	\$ 64	\$ -
Total Assets	<u>\$ -</u>	<u>\$ 64</u>	<u>\$ -</u>

Assets measured at a fair value on a recurring basis at December 31, 2010 are summarized below:

	Fair Value Measurement Using		
	Level 1	Level 2	Level 3
<u>Assets:</u>			
Interest Rate Swaps	\$ -	\$ 180	\$ -
Total Assets	<u>\$ -</u>	<u>\$ 180</u>	<u>\$ -</u>

Assets measured at a fair value on a non-recurring basis at June 30, 2011 are summarized below:

	Fair Value Measurement Using		
	Level 1	Level 2	Level 3
<u>Assets:</u>			
Nonaccrual loans	\$ -	\$ -	\$ 5,065
Total Assets	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 5,065</u>

Assets measured at a fair value on a non-recurring basis at December 31, 2010 are summarized below:

	Fair Value Measurement Using		
	Level 1	Level 2	Level 3
<u>Assets:</u>			
Nonaccrual loans	\$ -	\$ -	\$ 6,857
Total Assets	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 6,857</u>

There were no liabilities measured at fair value on a recurring or non-recurring basis at June 30, 2011.

As more fully discussed in Note 2L and Note 11 of the 2010 Annual Report to Shareholders, accounting guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following represent a brief summary of the valuation techniques used for the Associations' assets.

Derivatives: The only derivatives held by the Association are our interest rate swaps, which meet the definition of Level 2 financial instruments. The derivative positions are valued using internally developed models that use as their basis readily observable market parameters such as benchmark interest rate curves, volatility and other inputs that are observable directly or indirectly in the marketplace.

Nonaccrual Loans: For certain loans evaluated as nonaccrual, the fair value is based upon the underlying collateral, since the loans are collateral dependent loans. These loans are generally classified as Level 3 assets.

NOTE 6 - DERIVATIVE FINANCIAL INSTRUMENTS

The Association enters into derivative financial instruments known as “received fixed” interest rate swaps. The counterparty to the Association’s swaps is CoBank. Please see the 2010 Annual Report to Shareholders, particularly Note 2K and Note 15 to the Financial Statements, for a more complete description.

The following tables show the impact of these derivatives on the financial statements as of or for the quarter end:

	Value at	
	<u>June 30, 2011</u>	<u>Dec 31, 2010</u>
<u>Balance sheet:</u>		
Accrued interest receivable	\$ 7	\$ 15
Accrued interest payable (included in other liabilities)	-	-
